

Press Release

Arelion Unveils New Prague PoP at CRA's DC Tower Data Centre

New PoP builds on Arelion's legacy to support the region and its future traffic growth

Stockholm, 15 March 2023 – [Arelion](#) has today announced the provision of a new PoP (Point of Presence) at the [DC Tower Data Centre](#) in Prague, the Czech Republic's capital city. As part of the company's commitment to the region, this will be the second Arelion PoP in Prague. Supporting current and future growth in traffic, the new PoP provides direct access to the global Arelion AS1299 IP backbone, with high-speed [IP Transit](#), [Cloud Connect](#), and [Internet Exchange \(IX\) Connect](#) services for content providers and enterprises.

Arelion has long been committed to ensuring Prague has the connectivity needed by its businesses, content providers and consumers, having been the first provider to install a backbone point of presence in the city in 2000. The new PoP will provide additional capacity, resilience and choice to those requiring IP services in the metropolitan area, where traffic has grown as consumers take advantage new services, such as streaming, and businesses require improved access to global cloud services.

Patrik Andreasson, Head of Sales Nordic, CEE and Balkans at Arelion, said: "Growing the number of PoPs that we have in Prague is an important step forward for businesses in the region, giving them greater choice over where to locate their services and join the internet backbone. Along with this installation at the DC Tower Data Centre, our latest IP services make it easier than ever before for companies to reach cloud services from companies such as Amazon Web Services, Google and Microsoft, and give the best possible experience to their own customers."

Petr Možiš, Chief Commercial Officer at the CRA DC Tower Data Centre, said: “Prague is a growing technology centre, and one that we are proud to be an important part of. This new PoP will give our customers great redundancy and capacity, with lower latency, whilst ensuring that we can support the continued growth in our technology sector and in consumer consumption of data services.”

About Arelion

Arelion solves global connectivity challenges for multinational enterprises whose businesses rely on digital infrastructure. On top of the world's #1 ranked IP backbone and a unique ecosystem of cloud and network service providers, we provide an award-winning customer experience to customers in more than 125 countries worldwide. Our global Internet services connect more than 700 cloud, security and content providers with low latency. For further resilience, our private Cloud Connect service connects directly to Amazon Web Services, Microsoft Azure, Google Cloud, IBM Cloud and Oracle cloud across North America, Europe and Asia.
